

Office of the Chief Medical Officer of Health

COVID-19 Screening Tool for Businesses and Organizations (Screening Workers)

Version 10 – October 25, 2021

This screening tool provides advice, recommendations and instructions issued by the Office of the Chief Medical Officer of Health in accordance with [O. Reg. 364/20: Rules for Areas at Step 3](#) made under the [Reopening Ontario \(A Flexible Response to COVID-19\) Act, 2020](#) (ROA).

The person responsible for a business or organization that is permitted to be open must ensure that **workers, whether or not they have been vaccinated, are actively screened** for COVID-19 before they go to work or start their shift each day. Individuals with vaccine certificates are still subject to the workplace screening requirements as set out under O. Reg. 364/20.

This screening tool is not to be used as a clinical assessment tool or intended to take the place of medical advice, diagnosis, treatment or legal advice. In the event of any conflict between this document and any applicable legislation, or orders or directives issued by the Minister of Health or the Chief Medical Officer of Health, the legislation, order or directive prevails.

Anyone who is sick or has any symptoms of illness, including those not listed in this screening tool, should stay home and seek assessment from their health care provider if needed.

The questions in this tool have been defined by the Ministry of Health. These questions can be adapted to meet the communication needs of people with learning, developmental or cognitive disabilities.

This screening tool is **not applicable** to some health care settings (for example, [long-term care homes](#)), and some non-health care workplaces (for example, [retirement homes](#), other congregate living settings, [schools and child care](#)) where existing screening requirements and tools are already in place.

Screening is not required for emergency services or other first responders entering a workplace for emergency purposes.

Active screening must take place before the worker enters the premises of the business or organization. This screening tool can be completed either [online](#) before going to work or on-site before starting the shift or workday. Screening should occur before or immediately upon arrival at the workplace at the beginning of the worker's shift or workday to minimize interactions with others. The employer must ensure that screening occurs, and the result of screening is used to determine whether the worker may enter the workplace.

A worker may only enter the workplace if they have passed the screening. Any worker who enters the workplace must continue to follow all public health and workplace control measures, including masking, maintaining physical distance and hand hygiene.

Anyone who does not pass screening must not enter the workplace and be advised that they should self-isolate, ideally at home, and call their health care provider or Telehealth Ontario ([1-866-797-0000](tel:1-866-797-0000)) to get advice or an assessment, including if they need a COVID-19 test.

Required Screening Questions

1. ~~Do any of the following apply to you?~~

- ~~• I am fully vaccinated* against COVID-19 (it has been 14 days or more since your final dose of either a two-dose or a one-dose vaccine series)~~
- ~~• I have tested positive for COVID-19 in the last 90 days (and since been cleared by the local public health unit)~~

~~If "Yes" skip questions 6, 7 and 8.~~

~~Personal health information is not collected when you complete this screening tool. The purpose of this question is to provide accurate isolation instructions, which are based on vaccination status.~~

2. **Are you currently experiencing one or more of the symptoms below that are new or worsening? Symptoms should not be chronic or related to other known causes or conditions.**

The symptoms listed here are the symptoms most commonly associated with COVID-19. If you have these symptoms, you should isolate and seek testing.

Please note that rapid antigen testing is not to be used for those with symptoms of COVID-19 or for contacts of known COVID-19 cases.

* A person is fully vaccinated against COVID-19 if,

- (a) they have received,
- (i) the full series of a COVID-19 vaccine authorized by Health Canada, or any combination of such vaccines,
 - (ii) one or two doses of a COVID-19 vaccine not authorized by Health Canada, followed by one dose of a COVID-19 mRNA vaccine authorized by Health Canada, or
 - (iii) three doses of a COVID-19 vaccine not authorized by Health Canada; and
- (b) they received their final dose of the COVID-19 vaccine at least 14 days before seeking access to the premises.

Do you have one or more of the following symptoms?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Fever and/or chills	Temperature of 37.8 degrees Celsius/100 degrees Fahrenheit or higher
Cough or barking cough (croup)	Not related to asthma, post-infectious reactive airways, COPD, or other known causes or conditions you already have
Shortness of breath	Not related to asthma or other known causes or conditions you already have
Decrease or loss of smell or taste	Not related to seasonal allergies, neurological disorders, or other known causes or conditions you already have
(For adults \geq 18 years or older) Fatigue, lethargy, malaise and/or muscle aches/joint pain	Unusual tiredness, lack of energy (not related to depression, insomnia, thyroid dysfunction, or other known causes or conditions you already have) <i>If you received a COVID-19 vaccination in the last 48 hours and are only mild fatigue, muscle aches, and/or joint pain that only began after vaccination, select "No."</i>
(For children < 18 years) Nausea, vomiting and/or diarrhea	Not related to irritable bowel syndrome, anxiety, menstrual cramps, or other known causes or conditions you already have

3. In the last 14 days, have you travelled outside of Canada AND been advised to quarantine (as per the federal quarantine requirements)?

Yes

No

4. Has a doctor, health care provider, or public health unit told you that you should currently be isolating (staying at home)?

This can be because of an outbreak or contact tracing.

Yes

No

5. In the last 10 days, have you tested positive on a rapid antigen test or a home-based self-testing kit?

If you have since tested negative on a lab-based PCR test, select "No."

Yes

No

6. In the last 10 days, have you been identified as a "close contact" of someone who currently has COVID-19?

If public health has advised you that you do not need to self-isolate, select "No."

Yes

No

7. In the last 10 days, have you received a COVID Alert exposure notification on your cell phone?

If you have since tested negative on a lab-based PCR test, select "No."

Yes

No

8. Is anyone you live with currently experiencing any new COVID-19 symptoms and/or waiting for test results after experiencing symptoms?

Children (<18 years old): fever and/or chills; cough or barking cough; shortness of breath; decrease or loss of taste or smell; nausea, vomiting and/or diarrhea

Adults: (≥18 years old): fever and/or chills; cough or barking cough; shortness of breath; decrease or loss of taste or smell; tiredness; muscle aches.

If the individual experiencing symptoms received a COVID-19 vaccination in the last 48 hours and is experiencing only mild fatigue, muscle aches, and/or joint pain that only began after vaccination, select "No."

Yes

No

Results of Screening Questions:

- If the worker answered **NO to all questions from 2 through 8**, they can enter the workplace. In the workplace, the worker must continue to follow all public health and

workplace control measures, including masking, maintaining physical distance and hand hygiene.

- In addition to following all the workplace's regular control measures, if the worker has received a COVID-19 vaccination in the last 48 hours and has mild fatigue, muscle ache and/or joint pain that only began after immunization, and no other symptoms, the worker must wear a surgical/procedure mask for their entire shift at work even if not otherwise required to do so. Their mask may only be removed to consume food or drink and must remain at least two metres away from others when their mask has been removed. If the symptoms worsen, continue past 48 hours, or if they develop other symptoms, they should leave work immediately to self-isolate and seek COVID-19 testing.
- If the worker answered **YES to any questions from 2 through 8**, they must not enter the workplace (including any outdoor or partially outdoor workplace). They should inform their employer of this result and go or stay home to self-isolate immediately and contact their health care provider or Telehealth Ontario ([1-866-797-0000](tel:1-866-797-0000)) to get advice or an assessment, including if they need a COVID-19 test.
- If the worker answered **YES to question 8**, they must be advised to stay home, along with the rest of the household, until the sick individual gets a negative COVID-19 result on a valid PCR test (e.g., lab-based PCR or a rapid molecular test, such as ID Now), is cleared by their local public health unit, or is diagnosed with another illness. Rapid antigen testing cannot not to be used test those with symptoms of COVID-19 or for contacts of known COVID-19 cases.
- If any of the answers to these screening questions change during the day, the worker should inform their employer of the change and go home to self-isolate immediately and contact their health care provider or Telehealth Ontario ([1-866-797-0000](tel:1-866-797-0000)) to get advice or an assessment, including if they need a COVID-19 test.
- Businesses and organizations must maintain a record of the date/time that workers were in the workplace and their contact information. This information may be requested by [public health](#) for contact tracing. These records should be maintained for a period of at least a month.
- Any record created as part of worker screening may only be disclosed as required by law.

Note:

- For those workers whose work responsibilities involve traveling to multiple locations as part of their work day or shift (e.g., delivery truck drivers, take-out, grocery,

prescription delivery staff, etc.), it is the responsibility of the worker's employer to conduct the screening and not that of the receiving business organization or individual. However, such screening may not exempt a worker from being screened by another organization/workplace if the worker is seeking entry into different types of premises (e.g., food deliveries to a long-term care home, and to other places or households).
